

Clear channels now owns about 1/2 of the commercial radio stations in Denver. It has had a stifling effect on the cultural and news content. Allowing further concentration of media will only silence more viewpoints. One can only wonder if the whole point of these proceedings is to silence those few remaining sources of information not controlled by giant corporations. This proposed removal or relaxing of the cross-ownership ban will give a very small number of companies a huge amount of power over our democratic processes, a huge amount of control over the thought processes of this nation. Please, end this assault on free speech.

Thank You,
Andrew Haase
